PROJECTS

Flipkart Clone :

The **Flipkart Clone** currently under work, but i have created a roadmap for this grand project and the key features of this project will be :

- 1) **Separate Interface for Buyer and Seller**
- 2) **User Authentication**
- 3) **Product Catalog Management**
- 4) **Shopping Cart and Checkout**
- 5) **Search and Filters**
- 6) **Order will be received by dedicated seller which have posted product**

This Project is developing using by React as frontend and Django as Backend, You can check related updates in my LinkedIn Post's section.

E-Commerce Website :

The Ecommerce Website , i have created is just a basic layout or designing for my practicing concept, all the react basic concept that are used at industry level is used in this project, think this could be said that this project is as a part of my beginner journey.
